age, wholly in quarter-dollars, was only \$156,000. The total number of pieces coined during the month was 699,788, of the value of \$436,380. Coining operations were suspended on the 21st inst., preparatory to the commencement of the alterations necessary to make the Mint building fire-proof. It will be seen that so long as gold shipments continue, and the California receipts go into bars, the Philadelphia Mint becomes almost an entirely useless institution and the expense of sustaining it might as well be saved.

The steamer from Boston to-day took \$646,500 in gold, of which \$489,000 went from here. Mr. Belment sent \$368,000, Wm. Hoge & Co. \$68,000, J. & J.

The Manhattan Company has declared a semi-anpual dividend of 4 & cert, payable on the 10th inst.; the Bank of the Republic 5 & cent, payable on the 13th inst.; the Brooklyn Bank 5 P cent, payable on demand; the Fort Plain Bank 5 47 cent, payable on the 4th inst.; the Elm Bank, New-Haven, a semi-annual dividend of 4 \$\psi\$ cent, payable on the 7th inst. The interest Coupons due this day on the Cleveland and Mahoning Railroad Company will be paid at the office of Ward, Campbell &. Co., No. 42 William-st. The City Bank of Brooklyn has declared a semi-ananal dividend of 4 P cent. The business at the Clearing-House was \$15,668,000,

The only new feature to-day in the Mechanics' Bank matter is a card from Mr. Knapp stating that "any reports or statements affecting its assets and liabilities are entirely groundless." This is true with regard to the present institution. The funds in question belonged to the old Bank before its reorganization, and if Mr. Edmonds owes anything, it is an abundantly good claim, and will be so much gain to the new Bank. The stock, however, sold yesterday at 1 P cent decline. Ma Edmonds was in the street to-day. The tard of Mr. Knapp did not meet public expectation, and the sentiment of the street was evidently running in favor of Mr. Edmonds, and against the Directors, The impression is very general that the deficiency in the interest money was caused by payments made for political services rendered to the Bank, and for which, of course, no vouchers could be obtained. We hear the statement renewed to-day that Mr. Edmonds will soon fully explain his position in a card to the stockholders of the Bank.

Mr. Albert H. Nicolay's regular semi-weekly and tion sale of Stocks and Bonds will take place to-morrow, (Thursday,) at 12] o'clock, at the Merchants' Exchange. On the list will be found 400 shares Lake Erie, Wabash and St. Louis Railroad, hypothecated. The Directors of the Hillsboro' and Cincinnati Rail-

road Company at a special meeting held at Cincinnati the 27th ult., elected Noah L. Wilson, President, in place of Samuel B. Keys, Esq., resigned. Mr. Wilson it will be remembered is the President of the Marietta and Cincinnati Railroad Company. These two Companies were united a few months ago by a perpetual contract by the stockholders; the terms of which secure the same value to the securities of both Companies. They will now be mauaged as one road, and by one President and one Superintendent. The two Companies now have in operation 117 miles of finished first-class railway; in forty days the Marietta Company will open twenty additional miles, and during the Autumn to Athens, being within 37 miles of the Ohio River at Marietta. It is expected that a railway connection will be had between Baltimore and Cinchanati, by this route, next Spring. This will be the shortest line from Cincinnati to the seaboard at Baltimore by seventy miles. The work on the Marietta and Cincinnati Railway is being pushed forward with great energy. This is one of the most important and commanding railways in its geographical position in the United States. No Company commands to a higher degree all the elements of traffe both in freight and passengers.

As we intimated some weeks ago, the Superintendent of the Bank Department has decided that the Banks holding securities in the Department which are over due, cannot be allowed to let them remain without interest. Mr. Schoonmaker has just issued the annexed circular to the Banks:

BANK DEFARTMENT, ALBANY, July 30, 1855.

The Stocksrequired by the General Banking Law to be deposited with the Superintendent as security for the circulating notes issued under it, to the several Banks and Bankers, are, in all cases, to be stocks of this State or of the United States, bearing an interest

of sirper cent & amum, or to be made to be equal to stocks producing such interest.

stocks producing such interest.

I hold for the — \$\int \text{ of stocks or revenue certificates past due and drawing no interest. You are therefore required to substitute for this amount such other securities as the law requires, or to make the same equal to a stock bearing an interest of 6 \text{ of ent } \text{ annum by a further deposit of stocks equivalent to 6 \text{ erent, or one year's interest on the amount thus matured; or, if your account will bear such reduction, to return and cancel such an amount of circulation as would be equivalent to such interest. In your case the amount required would be \$\text{ This should be done without delay.}

M. SCHOONMAKER, Seperintendent.

tity of Flour, Wheat, Corn and Barley left

het having touched 194. We hear again a report that an emicable argangement between this Company and the Steamship Company is probable. The following regulation in relation to unclaimed goods, we learn from The Washington Union, has

been made by the Treasury Department:

heen made by the Treasury Department:

"All goods unclaimed by the owner or consignee at the expiration of the period allowed by the law for the discharge of the vessel in which the same may have been imported, shall be sent by the Collector to stores owned or leased by the United States, of the first class, if there be any at the port. If there be no such stores, then said goods shall be deposited in a private bonded warehouse, the Collector paying to the proprietor the storage and labor for the time the merchandise remains in the warehouse and simed, and charging the same on the goods, if said or entered in pursuance of law. The owner or consignee of goods thus sent to the public store, and of which no entry has been made, may, at any time thereafter within the period provided by law, be allowed the privilege herein granted to bonded merchandise on making due entry thereof for warehousing.

At Bosten the Money market continues easy at 6 a 8

thereof for warehousing.

At Boston the Money market continues easy at 6 28 \$\psi\$ cent on call. Paper goes at 7 28 \$\psi\$ cent. The demand for Money is rather more active.

mand for Money is rather more active.

The work on the La Crosse and Milwankee Railroad is being pushed ahead with all possible speed. Twenty five miles of track are now laid, and as the iron is all ready the large number of men employed mest with no hindrance. The Company are confident of having the track laid and the road is running order to Hartford, 34 miles, the first week in August. The grading is going on rapidly beyond Horicon, between that place and Noyes's Corners. The latter place is distant but four miles from Beaver Dam and ten miles from Fox Lake. They have now purchased and on its way to Milwankee from the East iron sufficient to reach Beaver Dam. They have also the greatest confidence in being able to reach Horicon by the first of fidence in being able to reach Horicon by the first of October. They have just received the seventh locomotive; three more are on the way, and two more first rate passenger cars, which, together with those formerly received, with their numerous freight-cars, will enable them to carry on business at once. The prospects of the company are most bright and encouraging for the completion of the road to Beaver Dam and Fex Lake during the coming winter.

\*\*alls of \$6.0.00 at \$1.50.

\*\*ILMBER.—The inquiry is very light for Eastern Spruce and Fine s \$1.50.

\*\*ILMBER.—The inquiry is very light for Eastern Spruce and Piece Sunf, at full prices.

\*\*MOLASSES—Holders are very first; some sales have been made at an advance of its per galon on New-Oriests of prime quilty. The stocks of all kinds are very much reduced the impact of the company are most bright and encouraging for the completion of the road to Beaver Dam and Fex Lake during the coming winter. and Fox Lake during the coming winter. [Milwanker Senting].

Markets. CAREFULLY REPORTED FOR THE TRIBUNE. Markets.-Carefully Reported for The Tribune.

ASHFS.-The market is easier for Pouris; cales at \$6.372.3 \$6.36. Pets are steady, and considerable sales are \$6.372.3 \$6.36. Pets are steady, and considerable sales are reported at 80.078. Shows a substance of the South and South-West is rapidly increasing, and holders evince much frimness in view of the rising tendency in the raw material. The assortment is not very good of heavy work, and prices of this are rather firmer. There is no export inquiry.

BEESWAX.-A fair demand for Western, with sales of 1,500 to view at 27,2726. cash.

COAL.-A fair demand for Anthracite at \$4.750.\$5.25 from vessels, and \$5.50.3 \$6.00 \$0.00 \$1.

counts as a second of the seco

berce at \$10.185, 6 mos. now hend at \$10.75. Other kinds are quiet.

TALLOW—The market is steady, with a moderate inquiry for home use, salse of 35,000 fbs. Prime thy at like, cash. The stock is accumulating.

TEAS—At private sale more is doing at very full prices. The stocks are gradually diminishing and are light for this time of the year; there have been no arrivals this week. The market class more active and very firm.

TOBACCO—A fair demand prevails for Kentucky, mostly for manufacturing. Prices continue firm. Spanish is fairly active at our quoted rates. In Manufactured but little has transpired. The sales to day are 5 blods, at \$3.210c, 150 baies Harvans at \$23.270c, 150 cases Seedies at \$1.210c, 150 baies Harvans at \$23.270c, 150 cases Seedies at \$6.214cc, and \$5 belies Cube on private terms. The following are the stocks of Domestic and Spanish respectively:

New-York Cattle Market. WEEKLY REPORT of receipts and selling prices of REEVES.
MILK COWS, VEAL CALVES, SHEEP and LAMES,
and SWINE, with acarefully prepared account of the number, quality, and price of REEF CATTLE at the great
Wednesday market WASHINGTON DROVE YARDS,
Atthet. Prepared every week supressly for THE N. T.
TRIBUNE by SOLON ROBINSON.

WENNESDAY, Angust 1, 1856.

CURRENT PRICES FOR THIS WEER.

BERVES—These are sold by the head at a price equal to the raine per pound of the estimated weight of beef in the quarters. The hide and tallow, or "5fth quarter," is not counted in this market, as it is in Beston.

THE PRICES TO-DAY & By will average a little below hast

THE PAIGES TO-GAY P. Whit serings a little bottom last week, say less than 100.

First quality, 100 Siles, Medium, 91 Siles, Poorest, 1880e.

Sales generally from 98130e.

Faciles of Vial. Calves—Calves are amally sold through the year at 4 to 7e. a pound, live weight, except house from one to six days old known as "kittens," which bring \$1 25 to \$30 \$4 aach. In Antumns a good heavy "game Calves," as of months old, sell for \$30.56 each. A good for Veal sells often as high as \$250 56 50. old, sell for \$30.56 each. A good to vac sens of the constant of the constant

the road, and they are not generally estimated at over 6 cws. to day.

Mc. Harris tells us to say that he has driven here and sold 1.500 head in these yards this season, and has 200 head more to come, and if he gets off without lose as shall fee happy; and he bengit all his Bullocks at 45c or under; and an 55 to to the cws., at which he estimated, and in which he included some good fat corn fed Beeves, he would autain a lose. In fact, his great chance of getting out clear is the reduction in transportation. Farmers must reduce the price of Cattle and the price here must give way; the demand does not justify such rates as have been paid of late.

The very tip top cattle sold to-day to the largest buyers, who have no casion to pay for credit at 1/2. For instance, Chris. Gwyer be ught 12 head of the largest and fatnest bullocks sold to-day of Wm. H. Gurney, out of 28 from Fayette Co., Indians, by Wm. Shawben. They were fed by David Baker, and have evidently had grain up to the present time. He paid for the 12 head \$1,240, which the awner and broker say is logic, and the huger says about 1.6.

John flarris hought 21 out of the same lot for \$65 each, at same rate \$2.50. The average live weight of the drove was 1.60.00. The law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought 30 of Simon Ulery, out of a drove of 112 deep law bought

old grade Durhims.

Geo. Haws bough: 3t of Simon Ulery, out of a drove of 112 and fown beeves, at #73, or loid, by buyer—the seller says they are good 75 cmr, average, which would make them #1 each lines than 110.

and fown beeves, at \$10, or live, by bayer—the seller says they are good \$1 core, average, which would make them \$1 each less than 10 to.

White sold him freein 20 head out of 101 of Harris & Jacoby's draws of good Himsels stock, at 11c, seller.

Millier, Harring & Ginney sold 30 yesterday at Bergen, at the severage-buyers say 10 to.

One of the but dreves here is 100 head of Durhaus, from Bearbon County, Koncacky, fed by God, and owned and sold by Colver, Hurd & Hoffman at \$50, averaging 5 cmt. or 11c, \$20 to.

The same owners have 14 more from Kentucky—mixed, common and grades—that will average about \$6 cmt. and extend the average. Unit is a good drove and something above the average, the not equal to the other.

With H. Belden is selling 51 head from Kentucky by J. P. Besh estimated to average 10c, on \$5 cmt.

Right Murray has a very good Kentucky drove, 50 head, most grades, 4 wars old from Payette County, by Dalbey & Bro., selling at 10 filler, and expected to average \$77 on \$1 cort. They are eight days only from their native posture. With Laier bought seven at \$82, including one full-blood bowen header, very fat, which he extinates just 10 fc. Those are 35 head from Pickaway County, by Hunt & Builong, selling by Barney Bartram, who estimates them at \$7 cmt. and some worse.

The best are 56 head from Pickaway County, by Hunt & Builong, selling by Barney Bartram, who estimates them at \$7 cmt. or \$00 a head. They are mostly grades, 4 and 5 years old, and have been feedling free weeks in this State, and that accounts for their present good locks. We fear the owners will make mething, as they paid five cents a pound, live weight in Kentucky and have been waiting for a market that would justify their sele.

Henry Hund has 56 head owned by Hugh Bell, average 65 meters.

the their cale.

Henry Hurd has 36 head owned by Hugh Bell, average 6; cut, and 16:50 (6c.

Sixty-nine head from Cayhoga County. Ohio, owned by T. C.

Eastmain, sold by J. C. Hoag, average quality and 6; cut. The broker expected to be able to average at \$65, but inter in the day accepted an offer of \$57 for 50 head from Newbourn & Strauss, which they count as 16c. \$9 in.

Sixty head brought by Erixtein of Wan, Harris, sold by Minler, Harring & Gurney at \$75; average 7 cut.

35 head of poor Steers, Cowa &c., by same brokers, will average \$40, and about 4; cut, ranging 55:10c. This belongs to the indifferent class. The worse are 18 more contemptible seal-laws;s—the very fag end of hard times—at \$36 each, or \$6. \$9.

They were brought from Ohio by Missione, who is ashumed to cut them, and says they were sent by him. Very wall; a partiaker is as lad as a thief. They weread by Jac. Glichrist who has \$9 of same owners, will average 6; cut and \$63.

A drove of Scheed from Picknewy County, O., owned by S.

M. Baker & Son, sold by John Amerit. Average quality, medium, average weight, \$6; cut, (live at 1.312); average price \$9\$ head \$65; range of prices \$9\$ B, \$200.

Jos. H. Williams has \$1, fed and owned by Ell Gwynne of Malton (c., Ohio, seelling at 196c. and expected to average \$77, 11 head from Ross Co., by Seymour, at 10c, will average \$60.

Two droves, owned by Wm. Hays, selling by Sherman & Wheeler and Meal & Huccomb, we should like to know why they were ever driven from the prairies. There is a sea of

Ayroun, average of our, and expected to make \$6.5 each. The hear sell at Ile.

Two droves, owned by Wm. Hays, selling by Sherman & Wheeler and Meal & Holcomb, we should like to know why they were ever driven from the prairies. There is a sea of grass, as free as air, and yet some of these little miserable thin streets look as though they would be afraid to reed against the fence lest their hides would get scross it, where the hides of crow-last are inclined to get. We are happy to think that the owner will lose money. If grass was scree on the grand prairie we could excuse the wickedness; out as it is plearly, and the brute too poor to skin, we skin the owner. If in his misery he would love company, here it is. Somebody by the name of Davis from somewhere in the State of New York, has 46 head beneals the contempt of every contemptable thing on earth except their scallawas arms.

would have company, here it is. Somebody by the mains of Davis from somewhere in the State of New York, has 48 head beneath the contempt of every cottemptable thing on earth except their scaling where who one it to be indicate for crueity of animals. None but a brue would bring such poor little starved brutes here, where a borde of starved paspers will pick, like a hungry doe, any hone that is thrown them.

In the name of justice and humanity we demand a law to pasie men for efferty such trash for sale for human food.

We are serry we do not know the full name and residence of this draver, that we might tell his neighbors to hook their dogs, for they must have a spite against him for robbing them of their food.

A rover complains of the Lake Shore Road, because a conductor put his cattle in a box-car, whense they were in danger of sufficient his cattle in a box-car, whense they were in danger of sufficient his cattle in a box-car, whense they were in danger of sufficient his cattle in a box-car, whense they were in danger of sufficient his cattle in a box-car, when they were in danger of sufficient his cattle in a box-car, when they were in danger of sufficient his cattle in a box-car, when they were in danger of sufficient his cattle in a box-car, when they were in danger of sufficient his cattle in a box-car, when they were in fall of the sufficient of the sufficient his cattle in a box-car, when they were in fall of the sufficient of the sufficient his cattle in the sufficient of the sufficient o

ever cause.

If a man signs such a contract he should complain if his neck was broke-particularly afterward. Another complains of the Belliontaine Boad for switching his cattle off for fourteen hours at one place. Perhaps he contracted to such a manner that they had a right to switch him till be was skinned and his cattle dead. Look to your contracts, and if you agree to have your cartle sufficients don't grumble.

desd. Look to your contracts, and if you agree to have your carrie enfocated don't grumble.

SHELP AND LAMBS—There is a perfect flood of poverty-stricken misery in the Sheep market. Lambe have sold for 63cc. a piece, and old Sheep at a dollar, to be killed and eache. Yet the market is good for good stock, and such as are fit o kill will average about \$4000 M by head. The receipts continue vary large—over 11,400—meetly from New-York. New-Jarsey and Ohio. There were 2,500 by the Eric Road last week, Jood Sheep are decidedly scarce. The prices of lots will be seen in SHEP BROKENS SALES.

The following sales of Sheep and Lambs were made by James McCours a household.

Mr. Mortimore remarks: The market this week has been rather more active than last week, although prices have not always to the market. There are but few Sheep on aund, and those are at an interfor quality. Good Sheep are scarce, and there are but few Lamba in market.

VFALS—For some seasocountable cape. Caives have sold better this week than for scome weeks provious. The camp is now 500 fc. § B. live weight, with an increased supply.

COWS are used her better in quality of price that they have been for some weeks. We think not much more than they many are see ling as there were one year ago. The receips last week show a considerable increase, but a portion of them to to the longible.

Albany Lumber Market. Werk ending Acc. 1.

Reported Specially for The N. V. Tribune.

Alexany Wednesday Aug 1, 1833.

The market has not been very active the past week, though a moderate business was done-fully up to the expectations of dealers at this season. Trade of all descriptions in the Samma menths is never brisk, and that in Lumber for as no exception to the rise.

The firmness in some descriptions of Lumber noticed last week will continues, attended with an upward tendency.

In Pine Taily Beards (sund) we find an advance of I cent on each and on Hembert Joist Sat a like advance. These indicates somewhat scarce, and the demand for them is, if anything, beyond the supply.

Freights continue very low, from the fact mainly that a large number of vessels have sain here for a long while unable to obtain leads.

The receipts by the Canals for the fourth week in July in the years named were as follows:

Boards and Scantlings. Shingless. Timber. Stares.

| The precious of the control of the rece is participal. Shingles. Timber. Staves. feet. M. Crt. 20. 114:072.200 1.500 6.110 4.29.30 1.4502.772 1.604 1.521 1.30.100 1.100.100 1.001 anne period last year.

The total receipts by the Canals, from the opening of navigaion up to and including the fourth week in July, in the year
samed, were as follows:

Boards & Scantling, Shingles, Timber, Staves.
